SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

Reference Collections of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries, receive current issues of U.S. Patents and maintain collections of earlier issued patents. The scope of these collections varies from library to library, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections are open to public use and each of the Patent Depository Libraries, in addition, offers the publications of the U.S. Patent Classification System (e.g. The Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions, etc.) and provides technical staff assistance in their use to aid the public in gaining effective access to information contained in patents. With one exception, as noted in the table following, the collections are organized in patent number sequence.

Facilities for making paper copies from either microfilm in reader-printers or from the bound volumes in paper-to-paper copies are generally provided for a fee.

Owing to variations in the scope of patent collections among the Patent Depository Libraries and in their hours of service to the public, anyone contemplating use of the patents at a particular library is advised to contact that library, in advance, about its collection and hours, so as to avert possible inconvenience.

* Unless otherwise noted.
** Delays occurred as a result of holiday leave, staffing shortages, computer outages, and leave due to adverse weather conditions.
*** The 5% of orders for which fiche are not on site are not included in calculations.
**** Decrease of 8 days since last month as we are printing the backlog created due to last year's budget cut.

The Correspondence and Mail Division (Mail Room) is experiencing a backlog for processing mail. This backlog is due, in part, to staff shortages within the Division and the unscheduled closing of Government offices caused by recent weather conditions in the Washington, D.C. area. To overcome this backlog, we have taken a twofold approach: (1) hired seven new employees who reported for duty in Jan., and (2) developed a "get well" plan designed to bring the Division back on goal.

To date, the new hires have worked out exceptionally well and are quickly learning their new duties and responsibilities. In addition, the Correspondence and Mail Division staff has been exceeding planned goals set in the "get well" plan, and we are presently ahead of the May 1, 1987 target date for being on goal.

IMPROVEMENTS TO SERVICES

- *Inclusion of Preliminary Classification on Filing Receipts* — We are now printing the preliminary classification assigned to an application on the Filing Receipt. It will show the class only and will be labeled "PRELIMINARY CLASS". The inclusion of this information is the result of suggestions from patent attorneys. We determined that the information could be provided with minimal impact to our operations, while improving service. However, we will not accept requests to correct the Filing Receipt for errors in or change to the preliminary classification.

HELPFUL HINTS

- *Certification Services Information* — During the past several months the Certification Branch has experienced a number of disruptions including a major move, retirement of key personnel, and shortages of necessary supplies. These disruptions resulted in some backlogging of work and much confusion among members of the public about procedures and turnaround times for certified copy orders. This memo set forth current procedures and time frames for certified copy order fulfillment.

Methods of Ordering:

Mail Orders. The address for mail orders is:

Commissioner of Patents and Trademarks
Box 10
Washington, D.C. 20231

The current goal for furnishing certified copies of applications as-filed is 17 days from receipt in the Mailroom of the Patent and Trademark Office to mailing of the completed order by the Certification Branch. The 17 days includes 4 work days for Mailroom and Finance processing, 9 work days in the Certification Branch and 4 weekend days that accrue over the 13 work days.

The 17 day goal applies to those orders for which microfiche of application-as-filed are available in the Certification Branch. The microfiche for a small percentage of the total orders for certified copies of applications-as-filed must be retrieved from a remote location, or be replaced due to damage or correction. The 17 day goal does not apply to these orders.

Hand Carried Orders

Hand carried requests for any certification service should be taken to the Public Service Window in the North Stacks of the Patent Search Room where they can be placed in the Certification Order Receipt Box or given to the attendant. For security reasons, the public is not permitted access to the Certification Branch itself.

Special Service for Patent Applications-As-Filed

If there is a need for special service, for example to meet a priority date within a short period of time, the order should be marked "RUSH" with the date/time needed and reason for the need and hand delivered to the Examination Services Division at CP2 7-D-19. Orders needing special service may also be mailed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231, clearly marked to the attention of Mrs. Peggy Dubose, Manager, Examination Services Division and include the date/time needed and reason for the need. However, because mail orders must be initially handled by the Mailroom, requesters are cautioned that turnaround time will be several days longer than for hand delivered orders. Every effort will be made to fill these special service orders timely with available resources.

PTO vs Public Supplied Copies for Certification

Requests for all certified copies of applications-as-filed and file wrapper/contents of pending patent and trademark applications will be filled with PTO supplied copies of original source documents. No public supplied copies will be accepted.

The public may submit copies of Registered Trademarks, Registered Trademark Files, Patented Files, and Patents for certification by the Certification Branch.

Status Requests or Problems

Status Inquiries — For status inquiries call the Input and Records Control Unit of the Certification Branch at 557-1587.

Problems — For problem situations call Ms. Lannie Anderson, Manager of the Certification Branch, at 557-1552.

Reference Collections of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries, receive current issues of U.S. Patents and maintain collections of earlier issued patents. The scope of these collections varies from library to library, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections are open to public use and each of the Patent Depository Libraries, in addition, offers the publications of the U.S. Patent Classification System (e.g. The Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions, etc.) and provides technical staff assistance in their use to aid the public in gaining effective access to information contained in patents. With one exception, as noted in the table following, the collections are organized in patent number sequence.

Facilities for making paper copies from either microfilm in reader-printers or from the bound volumes in paper-to-paper copies are generally provided for a fee.

Owing to variations in the scope of patent collections among the Patent Depository Libraries and in their hours of service to the public, anyone contemplating use of the patents at a particular library is advised to contact that library, in advance, about its collection and hours, so as to avert possible inconvenience.

MARKS PUBLISHED FOR OPPOSITION

The following marks are published in compliance with section 12(a) of the Trademark Act of 1946. Applications for the registration of marks in more than one class have been filed as provided in section 30 of said act as amended by Public Law 772, 87th Congress, approved Oct. 9, 1962, 76 Stat. 769. SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
